EXHIBIT 7:
COMPANY WEBSITE AD

Company: Tata Elxsi Limited
Position Title: Automation Developer
Location: 2701 Troy Center Drive, Troy, MI 48084 and unanticipated client locations throughout the U.S.

Position Responsibilities: Execute test suites, specifications, automation tools, and scripts on integrated TV platforms. Submit builds for certification and deployment. Conduct performance and memory analysis using Grafana and automation scripts to profile CPU, memory, and video rendering under runtime load on various SoC variants with high- and low-RAM configurations. Define test plans for migration scenarios, persistent data, cloud configurations, platform upgrades and rollbacks across legacy, retail, and newly manufactured devices. Validate APIs, plugins, error handling, and postmigration flows, including fallback handling. Maintain test coverage and system health analysis based on field issues, telemetry, Splunk data, stack trace crashes, and cross-team feedback. Triage product defects by reproducing realtime conditions, isolating root causes, and providing diagnostic logs and technical insights for resolution.

Position Requirements: Bachelor's degree (or foreign equivalent) in Computer Science, Engineering (any), Information Technology, Computer Information Systems, Management Information Systems, OR related field. Experience must include demonstrable knowledge: Linux; JavaScript; Python; Bugzilla; and Jira. In lieu of Bachelor's degree, will accept two (2) years of experience in the job offered or in a related position. Multiple positions available. Travel to unanticipated client locations throughout the U.S. approximately 30% as required. May telecommute from any location within the U.S. Any suitable combination of education, training, or experience is acceptable.

To apply, please email resume to nirbhayd@tataelxsi.com. Reference job code 57901.0578.
